BIOMASS BOILERS & STOVES

thermasis.com

THERMASIS offers comfort and economical heating with new cast iron stove series, as a combination of traditional design with addition of a modern look. All cast iron stoves in the range carry Eco-design label. Models with integrated oven are also available

All stoves are produced with latest foundry technology, and covered with high temperature resistant two-component paints. Standard delivery is made inside wooden cabinet to take optimum care of your product.

### Common features and strong points of our stoves:

- 100% gray cast iron technology and good finishing
- Portable external or internal ash pan
- Optimum combustion thanks to controllable primary and secondary air vents in front
- Adjustable secondary air flow allows the operation adapted to high chimney draft
- Optimum smoke evacuation with flame breaker
- 850 C heat resistant thermo-shock ceramic glass with self cleaning
- High temperature resistant sealing
- High temperature and moisture resistant paint
- Replacable cast iron legs
- Ash shaker controlled by hand flap
- Optional supply with ceramic glasses on both sides

# CAST IRON WOOD STOVES

## WIGAN

- Portable external ash pan
- New and modern design
- Additional air intake from the rear helps destroy hydrocarbons at high temperatures. Combustion is complete and pollution reduced.
